**To view the full list of confirmed exposure locations, visit**  
[www.oakgov.com/health](http://www.oakgov.com/health).

**Special measles vaccination clinics are open to the public tomorrow, Sunday, March 24, 10:00 a.m. – 2:00 p.m. at the following locations:**

- South Oakland Health Center, 27725 Greenfield Rd., Southfield.
- Young Israel of Oak Park, 15140 W 10 Mile Rd., Oak Park

Oakland County Health Division's Nurse on Call phone line will be open 10 a.m. to 2

p.m. on Sunday, March 24, to answer any questions. Please call 800-848-5533 or email [noc@oakgov.com](mailto:noc@oakgov.com).

“Unvaccinated individuals need to get vaccinated. If you do not have a record of two measles (MMR) vaccines, unsure if you have been vaccinated, or unsure if you have had measles in the past, contact your healthcare provider,” said Leigh-Anne Stafford, health officer for Oakland County. **“If symptoms develop, do not visit your doctor or emergency room unless you call ahead so they can take precautions to prevent exposure to other individuals.”**

Watch for symptoms for 21 days after potential exposure. Vaccine is effective within 72 hours of exposure to prevent illness. In addition, Immune Globulin (Ig) treatment is effective within 6 days of exposure for high-risk individuals. Talk to your preferred healthcare provider to determine if Immune Globulin is right for you and if it is available. High-risk individuals include those who are unvaccinated or unsure about vaccination status, pregnant women and those who are immune-compromised (have a weakened immune system due to illness and diseases like HIV, malnutrition, and/or medications).

Measles is a highly contagious, vaccine-preventable disease that is spread by direct person-to-person contact, and through the air. The virus can live for up to two hours in the air where the infected person was present. Symptoms of measles usually begin 7-14 days after exposure, but can appear up to 21 days after exposure and may include:

- High fever (may spike to over 104°F)
- Cough
- Runny nose
- Red, watery eyes (conjunctivitis)
- Tiny white spots on the inner cheeks, gums, and roof of the mouth (Koplik Spots) 2-3 days after symptoms begin
- A rash that is red, raised, blotchy; usually starts on face, spreads to trunk, arms, and legs 3-5 days after symptoms begin

For more information about measles, visit [www.oakgov.com/health](http://www.oakgov.com/health) or call Nurse on Call at 800-848- 5533, Monday through Friday, 8:30 a.m. – 5:00 p.m. For up-to-date public health information, follow @publichealthOC on Facebook, Twitter, and Pinterest.
