

**Subject:** ATTENTION: PRESS RELEASE - Public Act 288 - ORV Use on State Land in Southern MI

Dear Valued Natural Resource Stakeholder:

On May 29 and 30, 2018, we held our PA 288 stakeholder outreach meetings at the Demmer Center in Lansing, Michigan. At those meetings, we promised our attending stakeholders that we would share the press release inviting public comment on the state forest road inventory for southern Michigan. We encourage you to share the link below with your affiliates and members; this release can also be found on [www.michigan.gov/dnr](http://www.michigan.gov/dnr) under “About Us” and “News Releases” for May 30.

## **[Public meetings on ORV rules for southern Lower Peninsula state forest roads set for June 4-8](#)**

Please note that public meetings will be held June 4 – 8, 2018. There are many ways interested members of the public can submit their input. The public comment period will end on July 15, 2018.

The attached map shows the counties included in the road inventory for southern Michigan, the locations of the public meetings, and the counties (color-coded) that will have staff representation at each respective meeting location, generally. (This map was created to assist in assigning DNR staff to meeting locations; however, stakeholders who attended the outreach meetings found this map useful so we have decided to share it more broadly.)

Feel free to contact us any time with questions or comments. We look forward to hearing from you.

Sincerely,

The Public Act 288 Implementation Team for Southern Michigan
